

Supply Chain Explorer: Laser lithography tools

This is an export from the Emerging Technology Observatory **Supply Chain Explorer** (<https://chipexplorer.eto.tech>). You can see the web version of this content at <https://chipexplorer.eto.tech/?filter-choose=input-resource&input-resource=N30>.

Laser lithography tools

Laser lithography tools draw patterns in a substrate using laser light. They are sometimes used to produce photomasks (though less often than e-beam tools). Like other maskless lithography tools, laser lithography tools can quickly and cheaply make new patterns, but are slow at drawing patterns into wafers, making them ill-suited to mass chip production.

Supplier countries

Notable supplier companies

- Heidelberg Instruments - Germany
- Mycronic - Sweden
