

Supply Chain Explorer: Electrochemical coating tools

This is an export from the Emerging Technology Observatory **Supply Chain Explorer** (<https://chipexplorer.eto.tech>). You can see the web version of this content at <https://chipexplorer.eto.tech/?filter-choose=input-resource&input-resource=N45>.

Electrochemical coating tools

Electrochemical coating tools use electrolysis to deposit materials. A common application is to deposit copper (used for wiring in chips) across a wafer. However, other techniques, such as chemical vapor deposition, can also deposit copper for some applications.

Supplier countries

Notable supplier companies

- Applied Materials - United States
- Grand Process (negligible market share) - Taiwan
- Lam Research - United States
