

Supply Chain Explorer: Crystal machining tools

This is an export from the Emerging Technology Observatory **Supply Chain Explorer** (<https://chipexplorer.eto.tech>). You can see the web version of this content at <https://chipexplorer.eto.tech/?filter-choose=input-resource&input-resource=N9>.

Crystal machining tools

Crystal growing furnaces and machining tools are necessary to produce all wafers-thin, disc-shaped materials fabs used to produce chips. The furnace forms a cylindrical ingot of silicon from polycrystalline raw silicon; machining equipment then cuts the ingot into wafers used for chip fabrication. These tools have relatively low value and complexity relative to other semiconductor manufacturing equipment.

Supplier countries

Other providers:

- China (mainland) (negligible)

Notable supplier companies

- Accretech - Japan
- Beijing JingYi Century Automatic Equipment (negligible market share) - China (mainland)
- Disco - Japan
- JSG (negligible market share) - China (mainland)
- Meyer Burger - Switzerland
- Okamoto - Japan
- Toyo - Japan
